## Work Experience

**Axel Technologies, India** *Software Engineer* *2017 – present*

- Design, develop, and deploy robust web applications using PHP, Laravel, jQuery, CSS, and HTML.
- Create mobile applications that use responsive design for multiple screen resolutions.
- Test applications to ensure that they meet client requirements for functionality, scalability, and performance.
- Support, debug, and troubleshoot client projects, solving technical issues quickly and accurately.

**Axel Technologies, India** *Software Engineer Intern* *Aug 2017 – Sep 2017*

- Developed front-end web applications using HTML, CSS Bootstrap, JavaScript, and jQuery and backend in core PHP and Laravel.
- Designed and developed applications using the MVP pattern.

**Uniq Technologies, India** *Software Engineer Intern* *Feb 2017 – June 2017*

- Worked with developers to create web and desktop applications using C#, .NET, ASP .NET and HTML.

## Projects

*HVAC Flat Rate Application* *2017 - Present*

- Worked as a critical member in a 15 person team to design and develop a mobile application for heating and air conditioning contractors using PHP, Lumen, HTML, CSS, jQuery, and Bootstrap.
- Developed modules with Laravel, and integrated third-party software QuickBooks.
- Created APIs using Lumen and developed core PHP modules to enhance the product's performance.
- Supported production release with bug fixes and modifications.

*Project Lead for Right Logistics*

- Developed the front end for both admins and clients using PHP, Laravel 5.6, HTML, CSS, jQuery, and Bootstrap resulting in a front end that was much more intuitive and user friendly.
- Managed a team of 5 and mentored junior developers by prioritizing work and supporting with technical guidance when necessary.

## Education

B.E. in Computer Science  
Anna University, Coimbatore, India

2017
